Professional Summary

Curious software engineering student and rapid problem solver with a deep passion for the startup ecosystem—thriving in fast-paced, high-ownership environments where I can build software, wear multiple hats, and help scale products from zero to one. I have won 17+ national and international competitions and built major projects like AGROTHINK (an AI agriculture platform on Huawei AppGallery), DHL IncidentHub, and the Bridge to Malaysia SaaS using AI tools like Windsurf and Antigravity. I learn quickly, deliver fast, and want to stay loyal to a growing company where I can help scale products and grow into key technical leadership roles.

Key Projects

AGROTHINK — AI-Powered Agricultural Platform 2024 – Present
Founder & Sole Developer | Flutter, Firebase, Huawei HMS SDK, Gemini AI *Published on Huawei AppGallery*

- Engineered a mobile platform offering AI crop disease detection and smart precision farming advisory for Southeast Asian smallholders.
- Published on the **Huawei AppGallery** as sole developer; integrated HMS Account, Push Notifications, and Location Services.
- Won **10+ national and international competitions**; selected as Top 15 team for LaunchX, Malaysia’s largest accelerator program.
- Validated dual monetization strategy: standard marketplace commissions and B2B agricultural consulting API licensing.

DHL IncidentHub — AI-Powered Incident Management System 2026
Full-Stack Developer | Next.js 16, Supabase, Gemini 2.5 Flash, UiPath RPA *dhlutm.vercel.app*

- Developed an enterprise incident management platform for DHL APAC Shared Service Centre, unifying 5 communication channels (Gmail, WhatsApp, photos, handwritten notes, calls) into one AI classification dashboard.
- Leveraged **Google Gemini 2.5 Flash** to extract 14 analytical fields, route to 8 departments, and flag regulatory compliance.
- Built a **UiPath RPA bot** to automate file and text ingestion, accelerating manual handling speeds by **5×** (from 7 minutes to 85 seconds).
- Projected annual savings of over **24,200 hours** and **RM 600,000** based on daily operations metrics.

Bridge to Malaysia — Student Application SaaS 2026
Full-Stack Developer | Next.js 14, Supabase, Google APIs, Resend *GitHub*

- Built a SaaS solution deployed on Vercel to coordinate student university applications from Bangladesh to Malaysian universities.
- Configured a Supabase PostgreSQL backend with Row Level Security (RLS), Google Drive API for storage, and Resend for emails.
- Developed client document portal, administrative pipeline management dashboard, and automated PDF invoice generation.

AI Chatbot — Lead Generation & Meeting Scheduler

June 2025

- Designed and implemented a custom lead generation chatbot using Flowise (LLM Orchestration) in **60 minutes** under live competition conditions; won **Tertiary Category Champion** at Johor Digital Literacy Day 2025.
- Qualified to represent Malaysia in the ICDL Asia Digital Challenge National Round (selected out of 39,000+ candidates).

SportX — Sports-Tech Startup Concept

2024 – 2025

- Co-founded and pitched a sports-analytics concept across national university competitions, securing HatchQuest 2nd Place, KNU SISC International Bronze (USD 200), and Pitch Lab 3rd Place.

CarBuddy — AI-Powered Microsleep Detection (MVP)

2025

- Served as team leader for a real-time computer vision mobile MVP designed to identify motorist drowsiness using standard phone cameras.
- Awarded the **Shell SelamatSampai Varsity Challenge National Grand Prize (RM 10,000)** over 200+ competing universities.
- Demonstrated the application live to Malaysia's Minister of Transport (YB Anthony Loke) and Shell Malaysia Country Chair.
- Featured in national print media including **The Star**, **New Straits Times**, and **Berita Harian**.
